

The REPRESENTATIVE warrants and represents to FUNERAL HOME that the REPRESENTATIVE is the person or the appointed agent of the person who by law has the paramount right to arrange and direct the disposition of the remains of DECEDENT and that no other person(s) has a superior right over the right of the REPRESENTATIVE.

The REPRESENTATIVE understands that following the cremation process; the CREMATORY uses its best efforts to remove all metallic by-products and other non-organic material such as dental material, metal staples or pins, implants, or prosthetic devices. In the case of all metals, the CREMATORY, with the express permission of the REPRESENTATIVE, shall package and ship these to IMPLANT RECYCLING, LLC so that they can be re-melted and recycled. The CREMATORY and/or FUNERAL HOME does not receive any compensation or fees for assisting with the recycling other than the payment of its actual costs for performing the removal and shipping fees.

The REPRESENTATIVE authorizes the CREMATORY and FUNERAL HOME to take the following action:

____ Recycle all metals through IMPLANT RECYCLING
(Initial)

OR

____ Do not recycle the metal. Instead, dispose of it with
(Initial) the remainder of the non-combustible material

WHY RECYCLE?

Provides an efficient, legal and environmentally sensitive method for disposal of metallic by-products.

Recycling these metals reduces the amount of mining and energy needed to make new metal parts while at the same time reducing landfill needs.

Recycling metallic by-products supports sustainable development by reducing air pollution, conserving natural resources and decreasing land and water contamination.

Recycling metallic by-products provides a helpful gift to a worthy charity.

IMPLANT RECYCLING

GREEN METHOD

Recycling is not only good for the environment - it is becoming the responsible choice among society. Implant Recycling has embraced this movement to better our environment by providing a green alternative to funeral homes and crematories. By recycling non-organic materials with Implant Recycling you can help save the environment and support local charities.
